DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s): 236, 238, 242, 243, 246, 248-251 and 253

236 and 238, drawn to a device and method respectively for opening a shell to release or admit a substance.

242 and 243, drawn to a self-propelled delivery system and a self-propelled substance delivery system respectively.

246, drawn to a shape memory material activated device involving created a path through a shell having a substance.

248, drawn to a shape memory material activated device for controlling the passing rate of a substance through a shell.

249-251, drawn to a shape memory material activated device for allowing the passing of a substance through a shell.

253, drawn to a system of shape memory material activated substance delivery devices.

Group II, claim(s) 237, 239 and 247

237 and 239, drawn to a temperature activated device and a method for arming a temperature activated device.

247, drawn to an extended temperature responding shape memory device using a variably deformed SME.

Art Unit: 2859

Group III, claim(s) 240, 241, 244 and 245

240, drawn to a self-propelled device using a shape memory activator (movement forward and backward).

241, drawn to a self-propelled device using a shape memory activator.

244, drawn to a self-propelled track system device using a shape memory activator

245, drawn to an energy conversion system having a module and means for providing traction and at least one energy transmission member.

Group IV, claim (s) 252

252, drawn to a shape memory material activated device for stimulating the senses and having shell with a substance.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, for the different inventions the designs and effects are different.

Group I is drawn to various substance delivery and/or retrieval devices employing a shape memory material activator.

Group II is drawn to a shape memory activators pre se and their properties of operation.

Group III is drawn to generic devices and systems involving being self-propelled by shape memory material activators.

Group IV is drawn to shape memory activated device for stimulating the senses.

Art Unit: 2859

3. A telephone call was made to Mr. Richard J. Apley on August 31, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
